EDUCATION

Chameli Devi Group Of Institution, Indore(M.P.) Bachelor of Technology (Information Technology) CGPA : 7.9	2020-2024
Garima Vidya Vihar Higher Secondary School Certificate GPA : 71.4	2019-2020

SKILLS

Backend	Java, Spring Boot, RESTful APIs, Microservices Architecture
Frontend	Angular, HTML, CSS
Security	Keycloak, OAuth 2.0, OpenID Connect, JWT, RBAC
Database	MySQL, DBMS, SQL Optimization
Tools	Git, Docker, Postman, IntelliJ IDEA, VS Code, MySQL Workbench, JMeter, DBeaver
Soft Skills	Problem Solving, Analytical Thinking, Team Collaboration

EXPERIENCE

Associate Software Engineer Arraysript India	Aug 2024 – Present
- Contributed to the development of Quotation Plus, a quotation management platform built using Spring Boot and Angular. - Implemented centralized authentication and authorization using an enterprise identity management solution to enable Single Sign-On (SSO) across services. - Configured authentication flows, roles, and permissions to support secure access control for different user types. - Integrated authentication with backend microservices using OAuth 2.0 and JWT-based security. - Customized login and account UI themes to align with product branding and improve user experience. - Worked on securing REST APIs and protecting frontend routes by handling access tokens and refresh mechanisms. - Designed and maintained backend services following a microservices architecture. - Improved application performance by optimizing SQL queries and implementing caching mechanisms. - Actively participated in debugging, code reviews, and API testing.	
Software Engineering Intern Arraysript India	May 2024 – Aug 2024
- Assisted in backend development tasks using Spring Boot under the guidance of senior engineers. - Built and tested RESTful APIs and integrated them with frontend components. - Supported implementation of authentication and authorization workflows for internal applications. - Participated in bug fixing, API testing, and documentation efforts.	

PROJECTS

Interpanely

- Built an end-to-end interview management platform to schedule, conduct, and track candidate interviews with panel members.
- Designed and developed backend services using **Spring Boot**, exposing **RESTful** APIs for interview scheduling and panel management.
- Integrated **Microsoft Graph API** for calendar-based meeting scheduling and automated interview invitations.
- Implemented centralized authentication using **Keycloak** and **OAuth 2.0** with SSO support across services.
- Applied rate limiting and caching strategies to ensure system stability and performance under load.
- Integrated **AWS S3** for document and resource storage, and developed Angular-based frontend screens for panel workflows.
- **Technologies:** Java, Spring Boot, Angular, Keycloak, OAuth 2.0, JWT, MySQL, Microsoft Graph API, AWS S3, Rate Limiting, Caching

Quotation Plus

- Developed a full-stack quotation management platform enabling businesses to create, manage, and track quotations efficiently.
- Built backend microservices using **Spring Boot** and designed RESTful APIs for quotation lifecycle management.
- Implemented role-based access control (RBAC) and SSO using **Keycloak** and **OAuth 2.0** for secure multi-user access.
- Developed responsive frontend interfaces with **Angular** to streamline quotation creation and approval workflows.
- Optimized database queries and integrated caching to improve application performance.
- **Technologies:** Java, Spring Boot, Angular, Keycloak, OAuth 2.0, JWT, MySQL, Microservices

ATM Simulator System

- Developed a desktop-based ATM simulation application using **Java**.
- Implemented features such as balance inquiry, cash deposit, withdrawal, and PIN change.
- Ensured secure transaction handling and database connectivity.
- **Technologies:** Java, AWT, MySQL
